RAPID PLANT ANALYSIS

WHAT IS A RAPID PLANT ANALYSIS?

- The goal of a Rapid Plant Analysis is to identify opportunities to reduce costs, reduce lead-time & reduce inventory while maintaining customer service levels by impacting all aspects of the business.
- The opportunities will be quantified and summarized in a Lean Transformation Plan with emphasis on ROI and tool to use.
- The client selects which projects to complete with Lean Focus post-analysis.
- We execute kaizen events to capture the opportunities and transfer our knowledge to you.

WHEN TO USE A RAPID PLANT ANALYSIS?

Medical Devices: Anesthesia Products

- \$20M in savings identified across 2 plants

Lean Focus Client Feedback:

- *"We have had multiple consultants come in and none have worked out or managed to deliver on their promises, you are the first."*

- **Understand:** You need to identify what areas of operations are experiencing unnecessary downtime or inefficiencies.
- **Benchmark:** You are uncertain as to where your plant stands as a benchmark from which to start measurable, lean process improvements.
- **Turnaround Plan:** You need a plan-of-action to reduce downtime, improve efficiency, lower inventory turnover, increase on-time-delivery, and maintain high-quality production.
